Pennsylvania is eligible for up to \$5.2 million in FFY 2022 and \$10.4 million in FFY 2023 of the State and Local Government Cybersecurity Grant Program (SLGCP). This funding will be used to continue and expand the cybersecurity services available to local governments through partnerships with the Office of Administration.

These services include security awareness training, anti-phishing exercise capabilities, vulnerability testing, and network intrusion monitoring.

Local governments will be able to apply for funding through a competitive grant program administered by the Commonwealth in the FFY 2024 and FFY 2025 of the SLGCP.

The same workshop will be offered on two dates for your convenience. You will receive an overview of the SLCGP grant process in greater detail and explain each of the four projects.
